*** * SANITARY SEWER CONNECTION NOTICE * ***

June 30, 2022

Dear Jefferson County Property Owner,

The Amsterdam Area Sanitary Sewer Project is substantially complete. You are hereby notified that you may now start connecting into the new sanitary sewer. A Mandatory Connection Resolution was adopted on June 27th by the Jefferson County Board of Health, which started a ninety (90) day deadline countdown to connect into the new sanitary sewer (September 25th, 2022). After the 90-day time period has elapsed, everyone will be billed for sewer. Anyone who is not connected after 90-days will be turned over the County Health Department for further action.

Each homeowner and building owner is responsible for connecting to the main sewer line, and is responsible for hiring a contractor who is approved by the JCWSD. It is your responsibility to request estimates from approved contractors and to choose a contractor to do the work. The District has no authority in an agreement between you and your contractor. Therefore, it is very important to understand the requirements, and to make sure estimates are clearly stated, contain, and describe all required work, and include any additional work that you may require for your particular situation. The District can provide input on any questions you may have during this process, but cannot help you once an agreement is signed between you and a contractor. Therefore, it is important to ask pertinent questions to the District before you sign any agreement.

Approved JCWSD Drain Layer Required:

Whether you live in Jefferson County or Carroll County, **the installation of your sewer lateral must be completed by a contractor who is an Approved Drain Layer with the Jefferson County Water and Sewer District (JCWSD)**. A list of Approved Drain Layers is included with this letter. Permits for Sewer Service will not be given to unapproved contractors.

Certified Hauler:

The contractor you hire to install your sewer lateral will be responsible for hiring a Certified Hauler to haul away the contents of your existing septic system, and then to crush and cap your septic tank. The Hauler must be selected from the approved list FOR THE COUNTY where your house or building is located. A Certified Hauler list for Jefferson County is included with this letter. The contractor's estimate should include the name of the Certified Hauler.

Existing Septic System Abandonment:

The contractor you hire will also be required to obtain a permit for abandonment of your existing septic system, which requires a fee to be paid to the applicable County Health Department. The Sewage Treatment System (STS) Abandonment Permit can be downloaded here.

The fee for the Existing Septic Abandonment Permit should be listed on your estimate:

- Jefferson County Health Department Fee - \$50

The Jefferson County Water and Sewer District would like to welcome you as a new County Sewer Customer. We would also like to thank everyone in the project area for your patience and cooperation during construction. If you have any questions or concerns, please do not hesitate to contact our office at (740) 283-8577.

Sincerely,

The Jefferson County Water and Sewer District
